### **EXAMINER'S AMENDMENT**

1. This application is in condition for allowance except for the presence of claims 10-12 to an invention non-elected without traverse. Accordingly, claims 10-12 have been cancelled.
2. Authorization for this examiner's amendment was given in a telephone interview with Walter Douglas on 7/6/2005.

The application has been amended as follows:

- Cancel claims 10-12.
- Replace "claim 7" in line 1 of claim 8 with "claim 1".
- Replace "claim 7" in line 1 of claim 9 with "claim 1".

### ***Response to Arguments***

3. The obviousness double patenting rejection over application number 10/652,013 has been withdrawn because 10/652,013 was abandoned on 6/30/2005.

### ***Allowable Subject Matter***

4. Claims 1-5 and 8-9 are allowed.
5. The following is an examiner's statement of reasons for allowance: The closest prior art is Herve (WO 01/73168 A1) and Price (US 2002/0066402 A1). Herve discloses a method of fluoride crystal growth utilizing an apparatus with a melting chamber and an annealing chamber, where the annealing chamber is set at a temperature less than the melting chamber (pg 13).

Art Unit: 1722

Herve also teaches lowering a crucible from the melting chamber into the annealing chamber to form a single crystal (Abstract). Price teaches a crucible containing raw material is lowered from a melting chamber into an annealing chamber maintained at a lower temperature than the melting chamber ([0037]-[0039]). Herve or Price does not teach or suggest a decreasing fast cooling profile is applied to the melting zone and an increasingly slow cooling profile is applied to the growth/annealing zone to diminish the temperature difference between the zones.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
